On Board

GULFSTREAM

G150

Decisive. Steadfast. Designed for excellence.

How do you design a really quiet midsize aircraft cabin? Well, it helps to get acoustics advice from a company that manufactures nuclear submarines.

Efficiency & Performance

Gulfstream was able to do just that when it designed the G150: its parent company, General Dynamics, builds subs for the U.S. Navy, including the super-stealthy Seawolf class. That's just one of the reasons why the G150 has the quietest cabin in its category.
